

## REALTIME-Risk

### Electrical Risk Assessment Tool in the Cloud

A complete approach to conducting an arc flash and shock risk assessment.

**REALTIME-RISK allows you to:**

- Create task-based or equipment-based assessments instantaneously on the job site from your phone, tablet, or computer.
- Email/Print/Save as PDF for documentation and/or company approval!
- Quickly look at multiple risk control methods to ensure you have the best possible solution and to consider the benefits of implementing the risk as low as reasonably practicable (ALARP).
- Design based on the 2018 NFPA 70E, ANSI Z10, and ISO 31000.
- Customizable look and text fields to meet your specific needs are available.
- Convenient dashboard to track and view current or past assessments.

**Ask us how the REALTIME-LOTO module works with REALTIME-Risk!**
